

Tonight Evening Show: Prediction Massachusetts

By Magdalena T. and Lina A.

Donald Trump, 74 years old, is the 45th president of the United States. At his side, the First Lady Melania Trump.

His oldest daughter Ivanka Trump leads his presidential administration as a senior adviser and supports, promotes, and influences his ambitions.

Joe Biden, Joseph Robinette Biden, is 77 years old.

In his political career he worked as a senator and as vice president under Barack Obama.

This year he runs for the position of president for the third time together with his family, as they said themselves.

He is married to Jill Tracy Biden.

Now I would like you to introduce our main state. We will predict which one of these two candidates will win the votes of the electors in this state.

And the state is - MASSASUCHETTS

MASSACHUSETTS

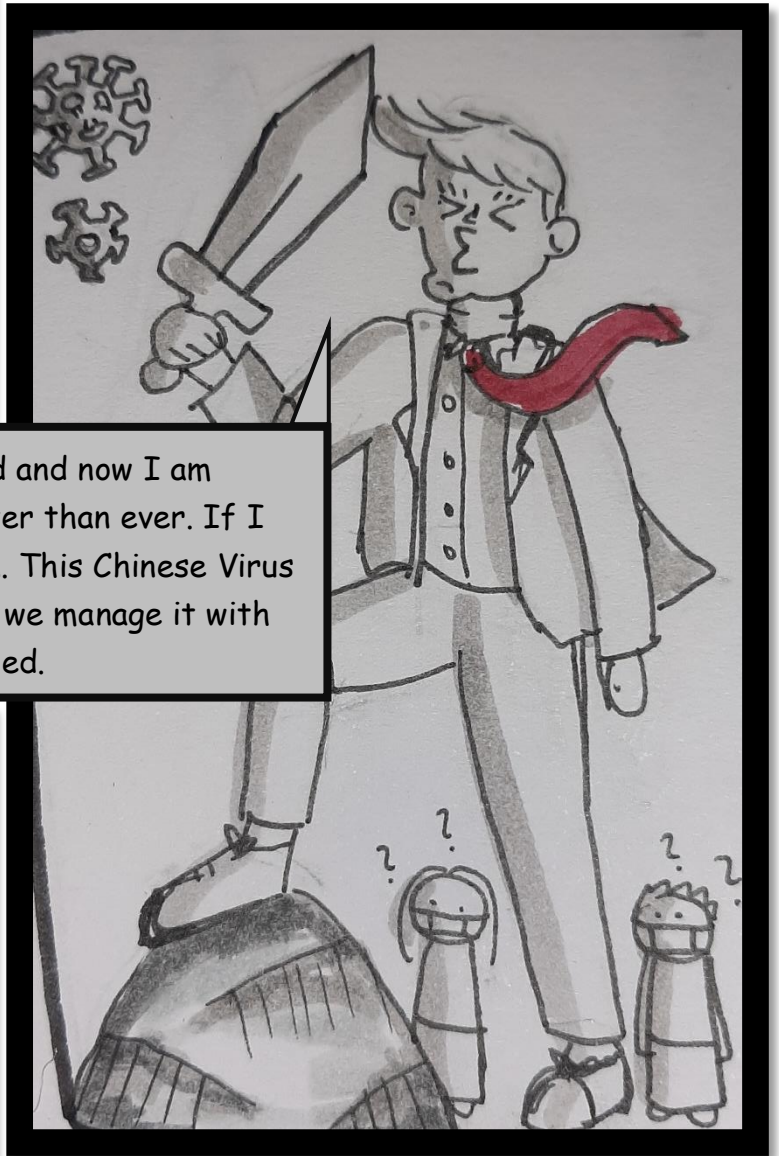

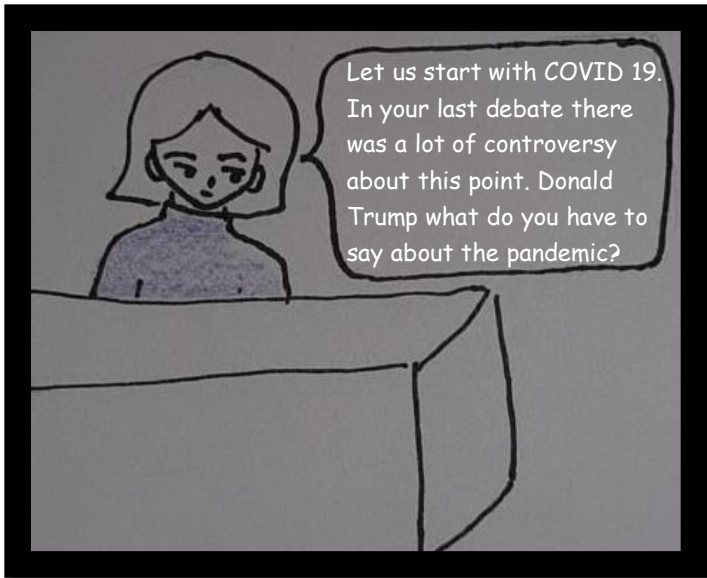

1928

71% white people

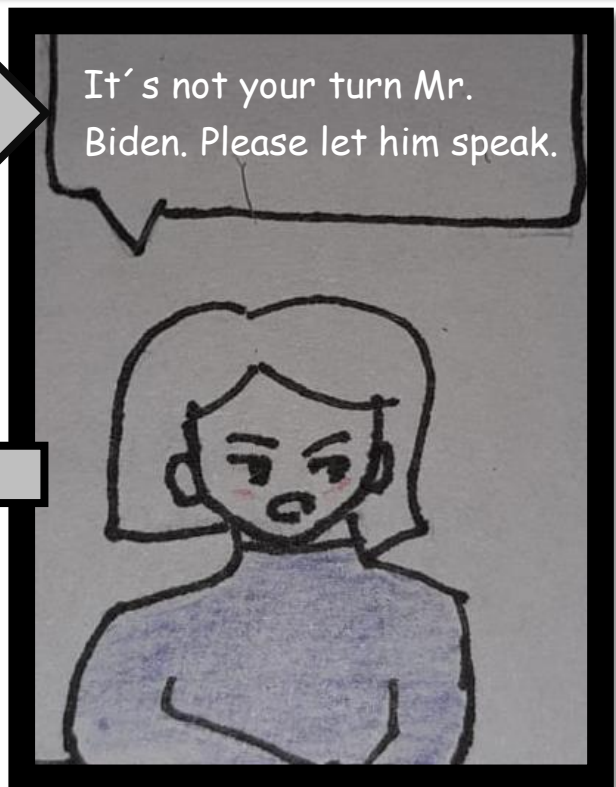

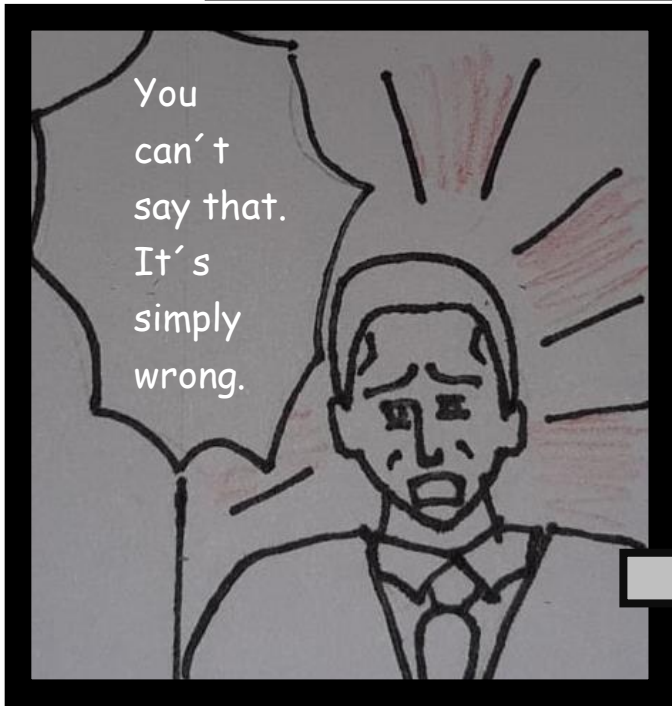

Massachusetts is a blue state since 1928. They only voted for a Republican four times. 71% of Massachusetts' inhabitants are white. It is also one of the least religious states but shines with its title as the state with the best education in the US.

There are a lot of topics that the Americans care about. In our focus today we will discuss the following topics:

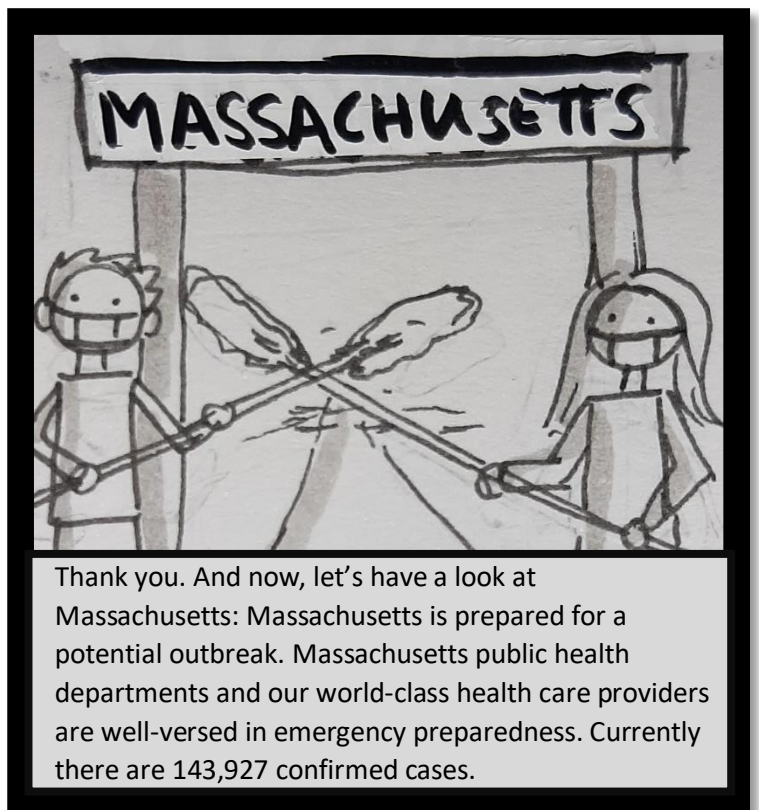

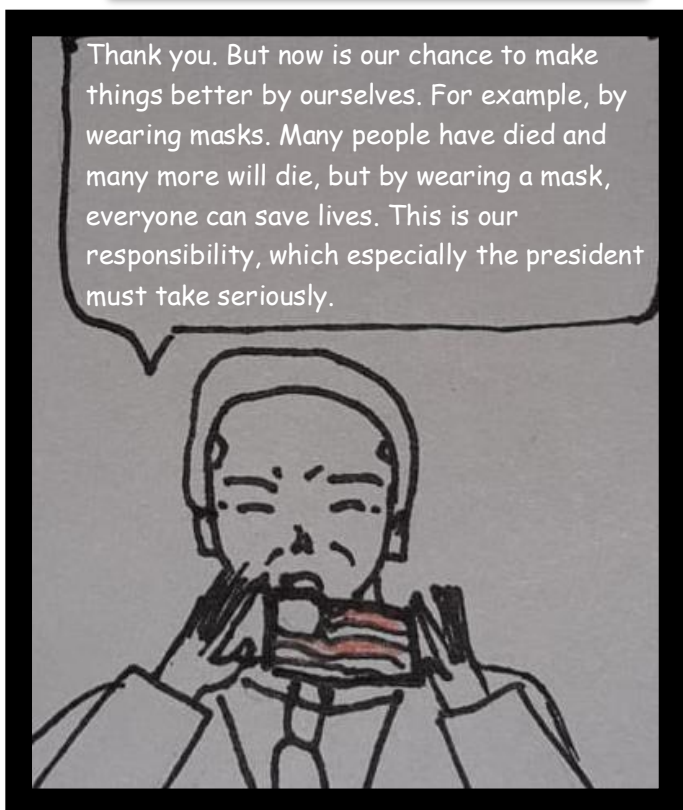

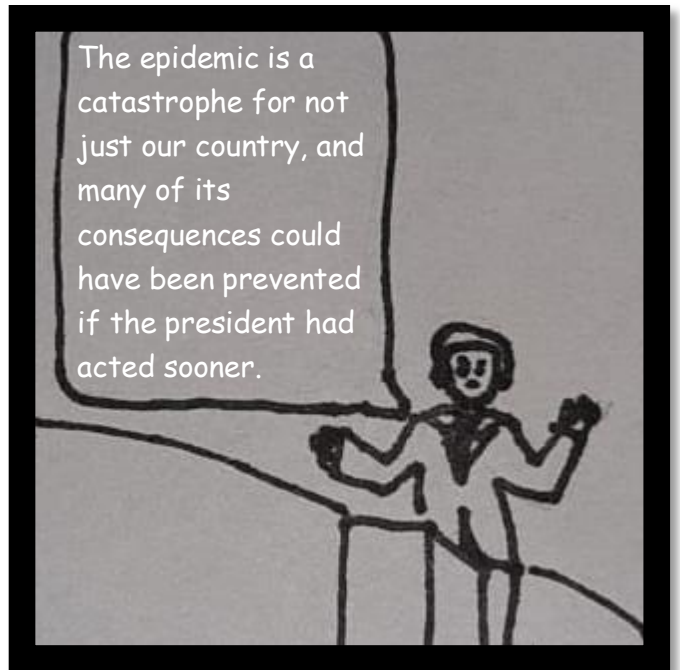

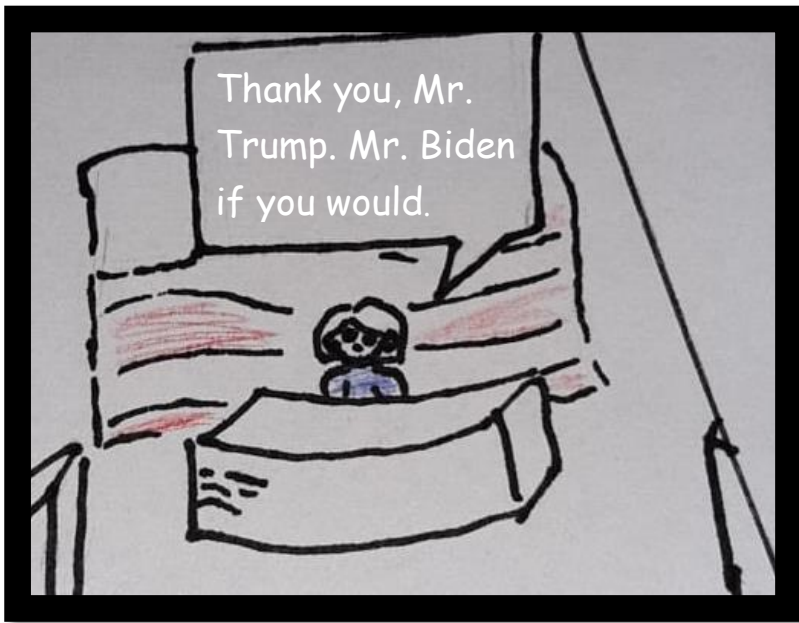

- COVID-19
- Economy
- Education
- Racism
- Climate change

As you all know I was infected and now I am standing here, and I feel better than ever. If I can handle this everybody can. This Chinese Virus is no danger for America, and we manage it with as much expertise as is required.

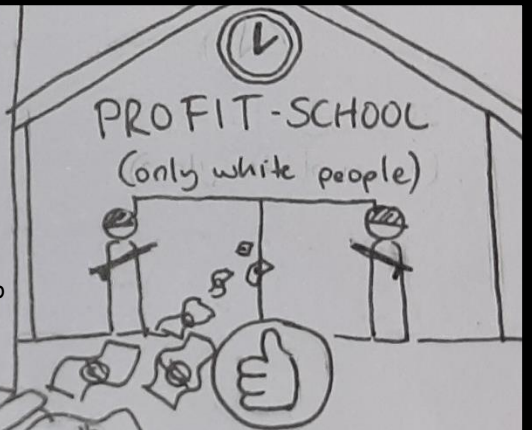

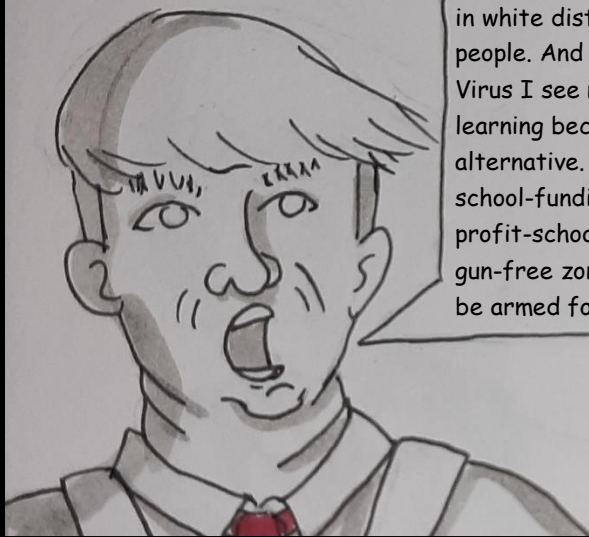

Trump: The Virus will disappear in a few weeks and everything will be like before. We just must get through this

Our next topic will be the education in our land. You two have a very different focus. One of you concentrates mainly on private schools, while the other puts great importance on public schools.

Firstly, I want to protect the schools in white districts from low-income-people. And regarding the Corona Virus I see no need for virtual learning because it is just a poor alternative. There should also be less school-funding and more support for profit-schools. I also say school are no gun-free zones. The teachers should be armed for protection.

I am against private schools. It steals chances. I will invest in public schools and increase their funds. Everyone should have the chance of a better future. Also, I want to make schools gun free zones and do not want to arm the teacher. This is not good for the teachers themselves. I want to give teachers in the schools, who raise our children for our future, what they

MASSACHUSETTS

Education

PUBLIC SCHOOLS

2% drop out

If we want to predict the outcome of the election in Massachusetts, we have to look at the very high education standard. They only have a drop-out-rate of 2%. Also they benefit strongly from public schools. In the beginning Massachusetts had a very poorly designed education system. They did not have enough materials, due to low funds.

When they finally increased this changed Massachusetts would benefit more, if they vote for Joe Biden, who is supporting public schools.

An important part of the topic violence is racism. President Trump in your last debate you did not distance yourself from racist groups. Can we conclude that you support racism?

I did never say something like this. This are fake news. I love everyone. But this does not mean that I will allow immigrants to overrun our county, because I love America the most. I will not allow that their culture will take over our American culture, I will not allow that they harm our economy.

That, what you are doing, is racism. Since you live in the white house, almost all the staff is white.

That is not true!

Of course, it's true. When I become president, I will make immigrants legal citizens and I will open Americas borders. Because that is part of our history, that we welcome people in our beautiful country. "Send these, the homeless, tempest-tost to me, I lift my lamp beside the golden door." This promise I want to make once again, as the President of the United States of America.

71%
white people

12%
Hispanic &
Latino

8%
African Am.
& Black

7.1%
Asian Am.

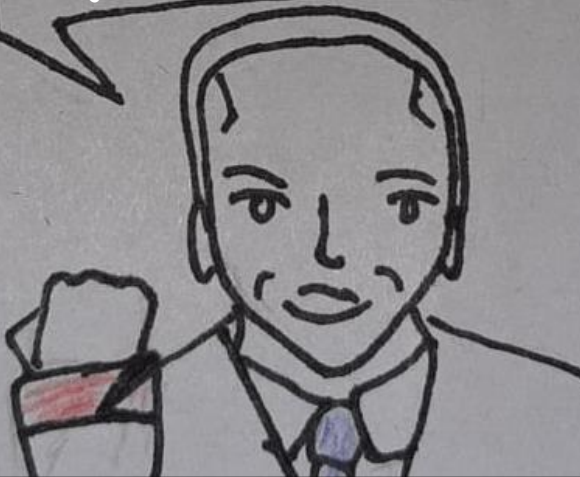

0.5%
Am. Indian

Even if racism is a very important topic in America, I must admit that this is not the case in Massachusetts. Of course, there is racism, for example in schools, but it is not a very common topic, because 71.4% of the population are white. Thus, you can say that it doesn't matter to 71.4% of the population. Because of the high level of education, we could predict again that the majority would agree with Joe Biden.

In the beginning we could hear a little bit about our economy already. COVID-19 is a real threat for the stability of the economy, but there is another danger: the climate change.

Of course, it is. And it is a great chance for us. We can build green economy which will create a lot of new jobs.

Again, the standard of education is important. Because of this they are aware of the climate change. Also, the state would benefit from the new jobs in the field green economy.

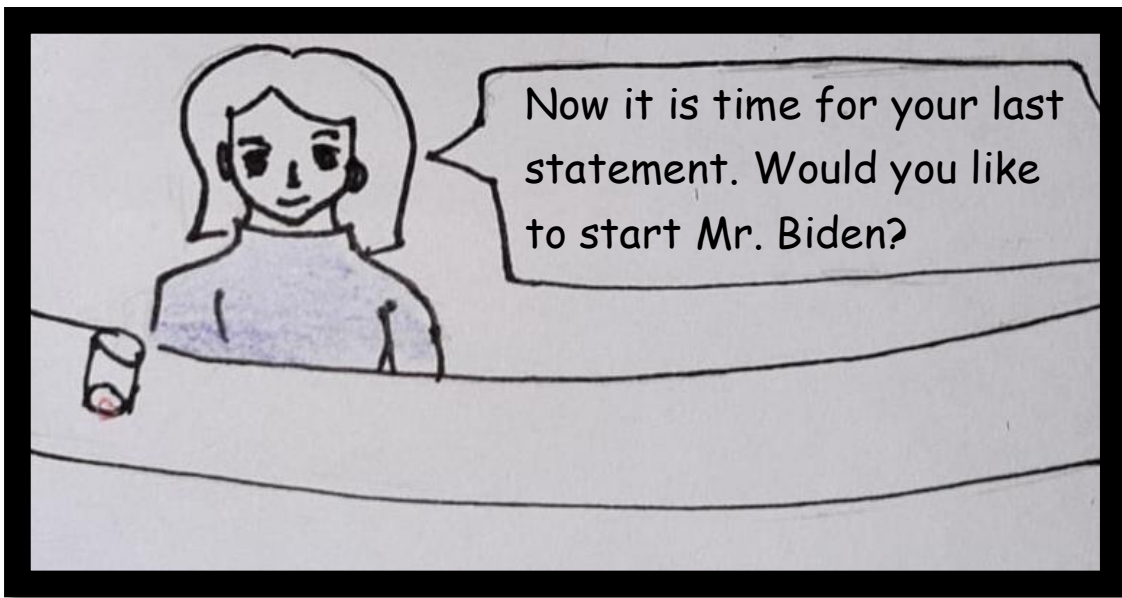

This are fake news There is no climate change caused by humans.

This was our last topic. But before we make a conclusion, I will relate your statements to the situation in Massachusetts.

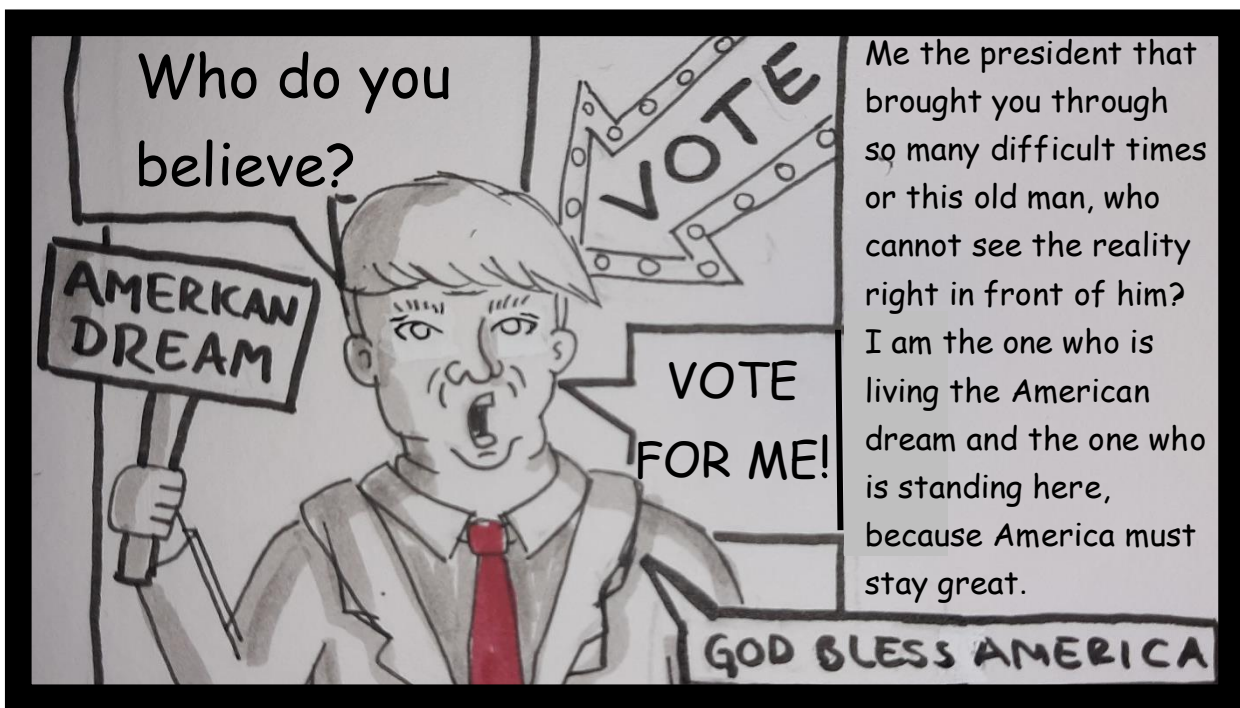

CLIMATE CHANGE
is REAL

Now it is time for your last statement. Would you like to start Mr. Biden?

Yes, thank you. I want to say to every vote for me is a vote for an America with future. An America with people who care about each other. I am standing here for everyone who still believes in the American dream.

Who do you believe?

AMERICAN DREAM

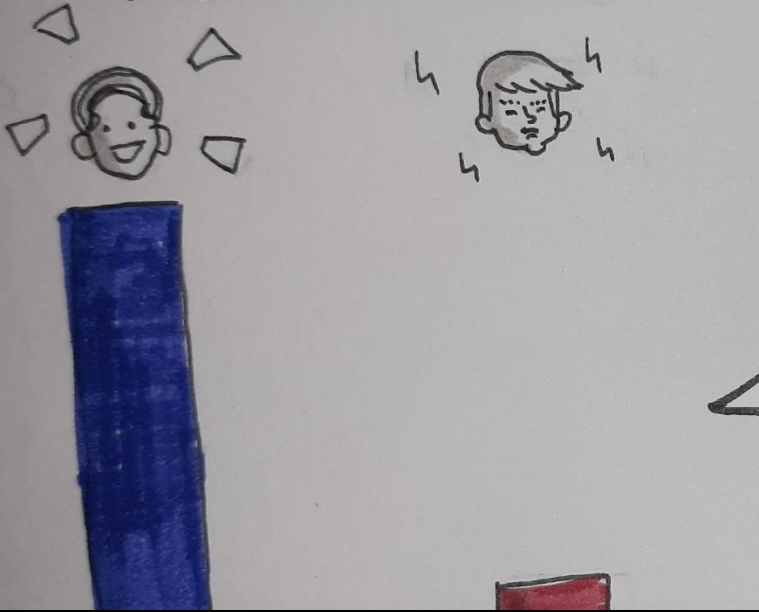

VOTE

VOTE FOR ME!

Me the president that brought you through so many difficult times or this old man, who cannot see the reality right in front of him? I am the one who is living the American dream and the one who is standing here, because America must stay great.

GOD BLESS AMERICA

MASSACHUSETTS

And now to our prediction. Massachusetts will vote with a majority for Joe Biden, because of...

... the high level of education

... the benefit from green economy

... the fact that they are not strongly confronted with immigration

... that they are against gun violence and have already established gun free zones themselves

... the majority benefits from public schools

... many people lost their job or family members because Trump did not act against the pandemic in time

... and finally: Massachusetts is not very religious in contrast to Trump.

Another point for Biden.

That was our debate tonight.

Thank you, Donald Trump and Joe Biden for taking part in this discussion.

Stay safe and healthy everyone.

Until next time.
